

Chesterton Connect™

Simplified equipment and process monitoring for pumps and sealing systems

Chesterton Connect is a simple to use data acquisition tool that enables you to safely and conveniently monitor your process and equipment's operating conditions. Utilizing Bluetooth® technology and a robust design to withstand harsh environments, Chesterton Connect makes it easy to monitor:

- Equipment vibration
- Process temperature
- Surface temperature
- Process pressure

Easy to install, Chesterton Connect combined with the user-friendly app allows you to connect to multiple sensors providing you with a comprehensive view of your plant's equipment health.

By setting thresholds, the mobile app and in-unit's LED display system alerts you of undesirable events. This alert system helps you better allocate resources to avoid unplanned downtime and asset failure.

The data can be exported for analysis to help you understand your equipment's operation and take preventative actions to extend productivity.

Applications

For use on pumps, mixers, agitators, and many other types of rotating equipment.

Chesterton
Connect™

Advantages

- Easy to install and configure
- Early detection of process instabilities
- Prioritize equipment maintenance
- Securely access your data
- View multiple sensors in one mobile app
- Replaceable battery

Recommended Installation Locations

Surface Vibration and Temperature

- 1 Inboard Bearing
- 2 Outboard Bearing

Process Pressure and Temperature

- 3 Seal and Seal Chamber
- 4 Discharge
- 5 Suction

Dimensions

HARDWARE TECHNICAL SPECIFICATIONS

Operating Parameters

Pressure sensor limit	68 bar g (1000 psig)
Temperature limit (body)	-20°C – 85°C (-4°F – 185°F)
Temperature limit (sensor)	-20°C – 125°C (-4°F – 257°F)
Vibration sensor	3-axis accelerometer ±16g
Battery	3.6V lithium thionyl chloride battery (replaceable)
Fitting	1/4" NPT 316SS connection
Mount	Magnetic mounting base (additional mounting options sold separately)
Certifications	FCC, IC, RoHS, IP66, NSF61, ACS, CE

Software Features

Security	Encrypted setup and password protected operation
Personalization	Configurable name and usage information
Data acquisition	Monitoring mode for extended battery life (5-minute intervals) and high accuracy mode for troubleshooting (1-minute intervals)
Data storage	Up to 30 days of rolling history
Alerts	Configurable thresholds, alerts, and user defined maintenance events
Analytics	Time plotted trends and analysis
Data export	Email export of sensor data and alarms

Product Ordering Number: 403700*

**Product does not include mobile device.*
