

Product information

REV2015204

NA-jointing-sheet TEADIT NA-1006

Construction:

NA-1006 is a non-asbestos jointing-sheet material produced from **aramid fibers, bonded with Nitrile rubber (NBR)**. It is manufactured through the hot calender process under rigorous quality control standards that are registered under ISO 9001 certification.

Application / Service:

NA-1006 is suitable for water, gases, oils, and acids in mild service.

Typical physical properties NA-1006:

Density - ASTM F1315 - g/cm ³	1,69 – 1,90
Compressibility - ASTM F36A - %	7 – 17
Recovery - ASTM F36A - % min.	55
Tensile Strength - ASTM F152 - psi	1300
Torque Retention - DIN 52913 – N/mm ²	26

Product Standard:

- Size: 1500 x 1600 mm or 1500 x 3200 mm.
- Thickness: 0.8mm; 1.0mm; 1.6mm; 2.0mm and 3.0mm

Technical data:

- Limit Temperature
 - Continuous Service: 220°C
 - Maximum: 300°C
- Pressure Maximum: 80 bar (1160 psi)
- Color: Green

Gasket Factors "m" and "y"(1):

Thickness (in)	"m"	"y" (psi)
1/16"	2.5	3,500
1/8"	3.2	3,000

The P x T diagram above indicates the service limits for **NA-1006** considering the simultaneous influence of pressure and temperature (chemical suitability assumed). The green area represents the normal service limits, while the orange coloured area shows the maximum application limits. For those cases, please consult our technical department.

Since all properties, specifications and application parameters shown throughout this catalogue are approximate and may be mutually influenced, your specific application should not be undertaken without independent study and evaluation for suitability. All technical data and advice given is based on experiences TEADIT® has made so far. Failure to select proper sealing products can result in damage and/or personal injury. Properties, specifications and application parameters are subject to change without notice. TEADIT® does not undertake any liability of any kind whatsoever. Please note: the colour of the actual product might vary from the above image on this data-sheet.
